**Re: City of Salem
Scope of Services & Cost Proposal for the Preparation of a Pavement Management
Program (PMP) Report
M2022-143**

Dear Mr. Angeli:

REMINGTON & VERNICK ENGINEERS is pleased to provide the following scope of services and associated cost proposal for professional services to prepare a Pavement Management Program (PMP) report for the City of Salem.

A PMP report is a comprehensive planning tool to guide the City's management of road maintenance. Proper and regular road maintenance extends the lifetime of most pavement types and reduces costs, by reducing the frequency of reconstruction and emergency maintenance. A PMP report is a valuable tool that is used to determine which roads will receive maintenance and when.

Our office proposes the following four (4) phased approach for the professional services required to prepare a PMP report.

PHASE I: COORDINATION AND ROADWAY INSPECTION

RVE will obtain roadway ratings of each of the approximately 17 miles of City-owned roads. The updated ratings will be determined by a field inspection and evaluation conducted by our technical staff. This field inspection and evaluation will consist of traveling each roadway segment a minimum of three (3) consecutive trips at 25 miles per hour (mph). This information, which rates ride characteristics and pavement distress (cracking, rutting, potholes, etc.), is recorded on the roadway rating form for each evaluated segment of roadway.

A roadway rating form, which is based on American Association of State Highway Transportation Officials (AASHTO) standards, is utilized to assign numerical values to different roadway defects. Higher numerical values are assigned to severe or frequently occurring defects and the numerical values for each defect are then summed and subtracted from 100. The resulting rating then defines the overall condition of the existing pavement. For example, a rating of 100 would be assigned to a perfect street with no cracks, potholes or other defects. A roadway with numerous defects may have a condition rating of 60 or less.

The updated ratings will also provide the City with an inventory of existing physical features of each road segment. These features, which will be included on the rating form for each road, include the length and average width of the roadway, the number and general condition of handicap ramps, the presence of storm drainage systems and the reporting of obvious drainage problems. Additionally, the updated inventory will include a general condition rating of the existing concrete curbing and driveway aprons as well as any other relevant information noted by the inspector or provided by the City, such as the Police Department's recent traffic counts and speed data. Once all of the updated field work is completed, this information is entered into a Microsoft Access database and will be utilized to determine preliminary pavement treatment recommendations.

PHASE II: PREPARATION OF CONSTRUCTION ESTIMATES

This phase of the project will consist of the preparation of construction estimates for each roadway based upon the "Roadway Inventory" sheet and recommended roadway improvements. The recommended roadway improvements may include, but not necessarily be limited to:

- Microsurfacing
- Milling and/or Overlay
- Full Depth Reconstruction

PHASE III: PREPARATION OF REPORT

RVE will prepare a comprehensive PMP report that will be utilized to manage the Township's existing infrastructure and prioritize future roadway and capital improvement projects more effectively. The PMP report will be based upon the roadway construction estimates and potential yearly capital funding. Our office will provide a 5-year, 10-year, 15-year, and 20-year road improvement plan based upon the City's request / recommendation. The report will detail our findings including documentation to support professional analysis, opinion, and conclusions. Additionally, the report will include a brief description of a Pavement Management Program, the roadway inspection, various roadway improvements and summary of roadway repairs for each road.

PHASE IV: PREPARATION OF MAPS

This phase of the project will consist of the preparation of a roadway improvement map depicting the recommended improvements for each roadway. The map is a helpful tool to determine the priority of roads to be repaired.

COST OF SERVICES

Our fee for these efforts shall not exceed \$15,750.00, which will be billed on a time & materials basis, detailed as follows:

City of Salem
Scope of Services & Cost Proposal for the Pavement Management System Report
July 8, 2022

Phase IV: Preparation of Map:	<u>\$ 3,500.00</u>
Total Professional Services Costs:	\$ 15,750.00

SCHEDULE

We anticipate that all work efforts needed to provide documents for submission to the City can be completed within forty-five (75) calendar days.

We are prepared to begin work immediately on this project upon receipt of formal authorization to commence work, and we look forward to working with you on this important project.

Should you have any questions, please do not hesitate to contact Mr. Anthony Chadwell at (856) 795-9595.

Sincerely,

REMINGTON & VERNICK ENGINEERS
